PHOVIA

**HEAL SKIN LESIONS &
WOUNDS UP TO TWICE
AS FAST WITH LIGHT**

With the power of light, you can help heal your pet's skin lesions and tissue injuries, safely, faster and with less medication.

NOW AVAILABLE
FROM YOUR VETERINARY PRACTICE

WHAT IS PHOVIA?

Phovia is a **revolutionary treatment** for skin problems in pets. Your vet has specially-trained staff who will use a carefully designed lamp along with a gel that is applied to the damaged skin.

2 MIN

One session of two minutes, twice a week (or four minutes, once a week!) will dramatically **accelerate natural skin regeneration.**

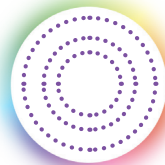

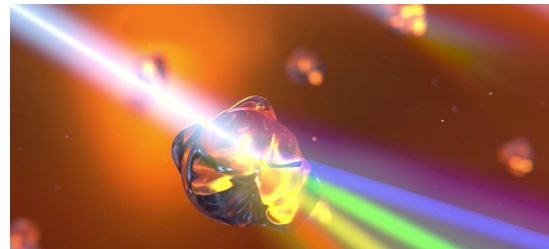

This is a whole new science, but Phovia has been scientifically proven to cut the time taken for skin to regenerate in half!

HOW DOES IT WORK?

The blue light from the lamp activates the gel, which floods the skin with multicoloured light, speeding natural regeneration.

It penetrates through the skin and acts on all the different layers of the skin at once, accelerating the body's natural processes of skin repair.

Reduces
inflammation

Speeds up
cell replacement

Boosts
local immunity

HOW WILL IT BENEFIT ME AND MY PET?

Skin repair is **twice as fast**, meaning your pet only needs to be on medication half as long. So, the many weeks of tablets, creams, sprays, powerful antibiotics and anti-itch medications, and maybe even a cone (that perhaps you've been dreading) **will be hugely reduced!**

This is a safe, effective, and non-invasive therapy - as far as your pet is concerned, we just shine a light on them.

It means your pet will be back to normal and free of discomfort in half the time. Even better **you can often see visible improvements in skin health after just two or three sessions!**
